

*Lyric*  
**SPEAKERS**  
**FULLRANGE**

A line of speakers with very peculiar characteristics

---

## Introduction

**A full-range drive unit consists of a single driver element used to move and control a diaphragm. Often the cone structure includes optimizations to enhance high-frequency performance.**

With Lii-Audio drivers, perfectly assembled, we have achieved a high level of sound quality at all frequencies, and high-performance dBs sensitivity.
